

CloudConnect

Heat with photovoltaics always in view, even in residential construction! Through device connection to the data cloud my-pv.LIVE.

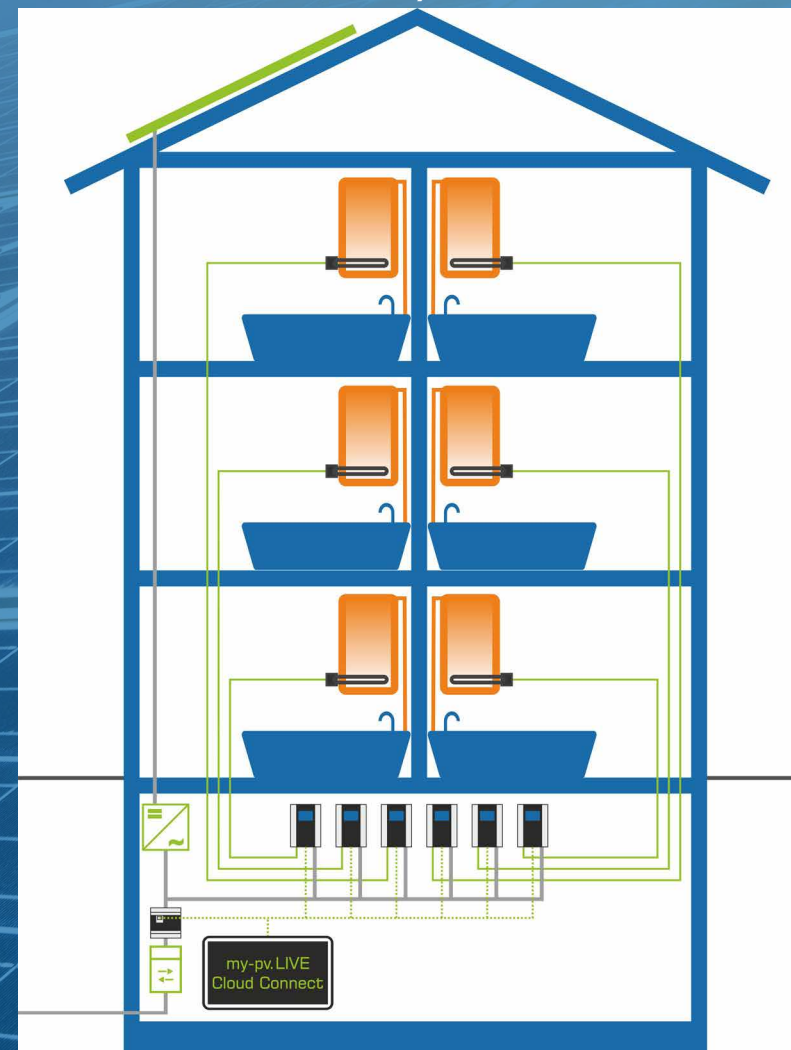

For autonomous hot water preparation with ELWA or grid-connected systems with AC•THOR/AC•THOR 9s.

- Remote settings possible via my-PV
- Two months remote monitoring of the plant free of charge
- Optional monthly extension of remote monitoring

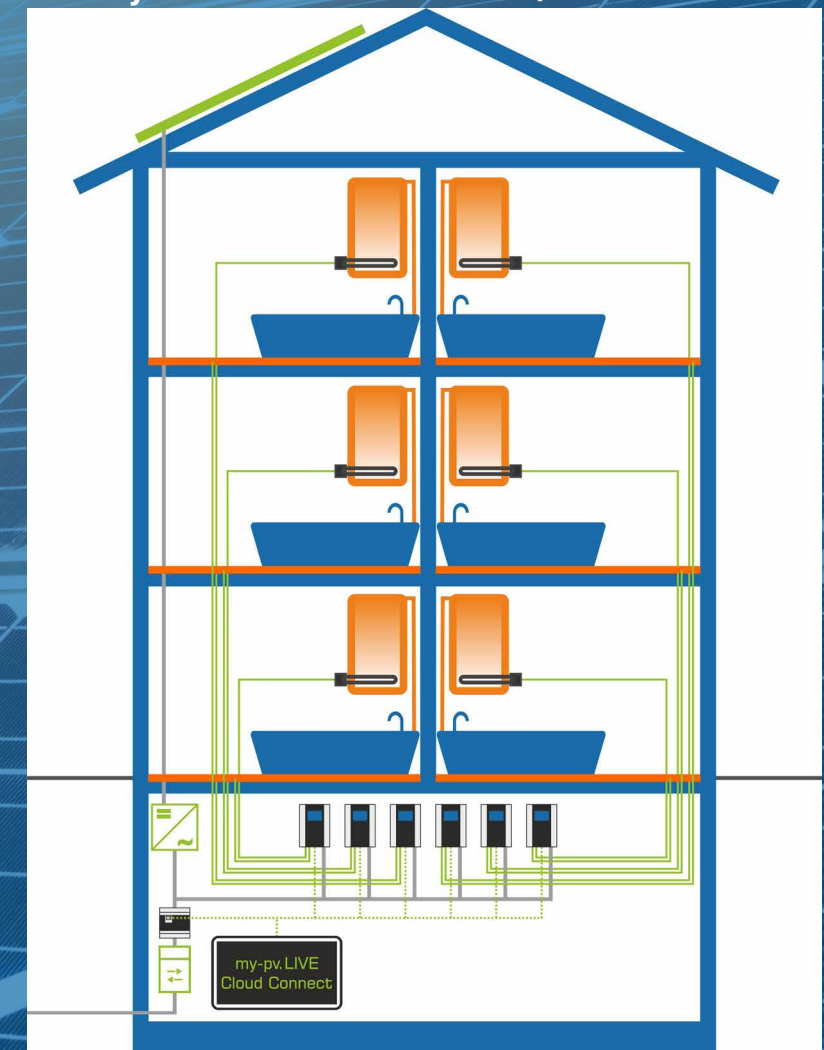

Autonomous hot water
with ELWA

Hot water in on-grid PV-systems
with AC•THOR/AC•THOR 9s

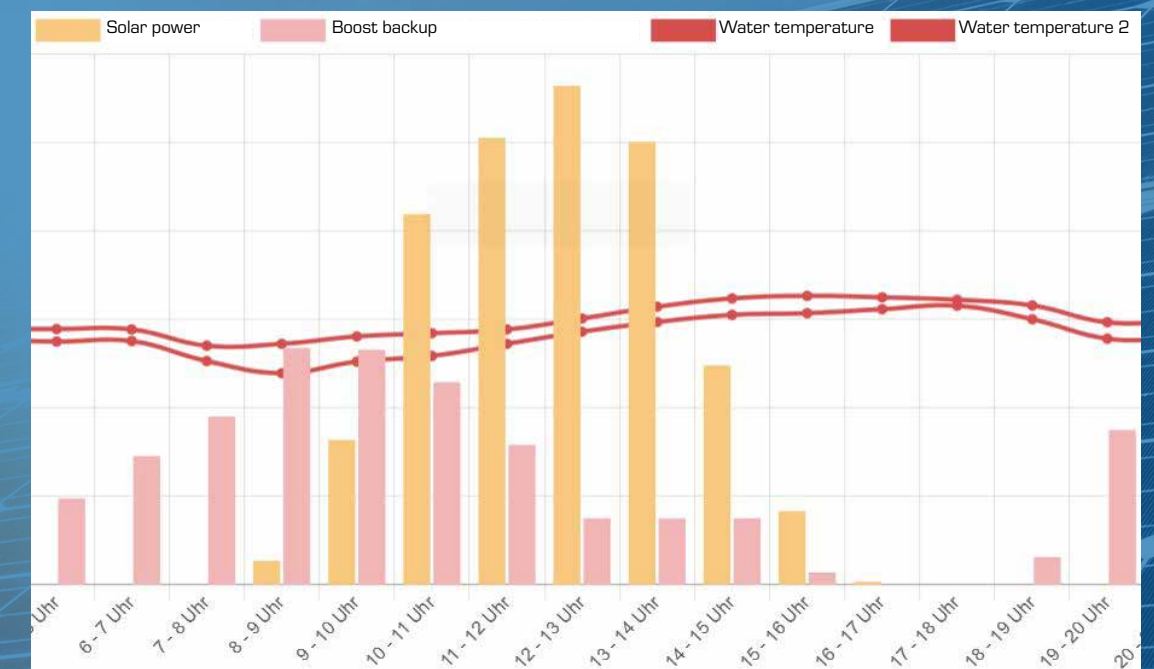

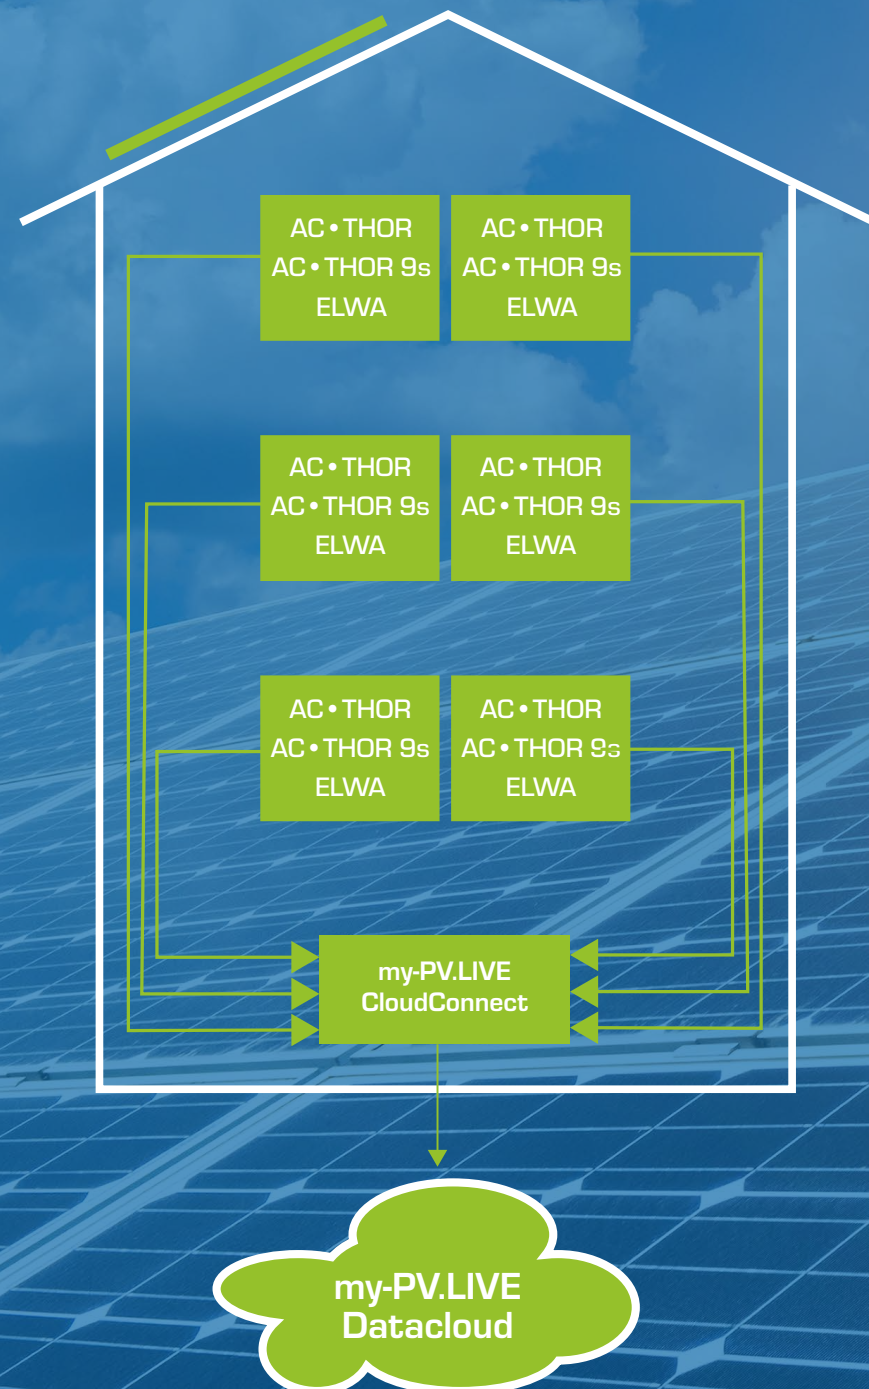

Hot water and heating in on-grid
PV-systems with AC•THOR/AC•THOR 9s

CLOUDCONNECT - HEAT GENERATION ALWAYS IN VIEW. ALSO IN RESIDENTIAL CONSTRUCTION.

What is CloudConnect?

CloudConnect enables the easy connection of all my-PV devices to our data cloud in the residential sector. This means that you have an overview of the current operating parameters at any time and anywhere. In addition, my-PV offers the option of continuous remote monitoring.
